

THE DIMMER III

Maximize shipment processing speed and accuracy with a connected scale and dimensioning solution.

The small package carriers have changed their rules for how you will process your parcels.

Oversize is being eliminated and dimensional weight calculations will be a requirement of almost every package you ship.

The Dimmer III can be installed by itself on your packing table, or configured with an inexpensive roller conveyor we provide as shown here.

Easily capture parcel weight and dimensions with one push of a button!

The Dimmer III can be implemented standalone, or integrated with almost any shipping software.

One second dimensional read times are some of the fastest in the industry.

The Dimmer III is available in a standard five foot length, or can be custom ordered to match your specific requirements.

Documentation for serial output string is included.

Are you...

- ◆ Continuously receiving dimensional adjustments on your small package carrier bills each week?
- ◆ Losing productivity due to manually measuring packages?
- ◆ Losing money by not invoicing your customers for ground and air dimensions, and additional handling charges when orders are shipped?

The Dimmer III

Technical Specifications

Parcel Measurement Range: From 3" x 3" x 3" up to 45" X 38" X 28"
Custom configurations available by quote.

Conveyor height: Adjustable: 23 5/8 up to 35 5/8

Read time for obtaining dimension measurements: 1 second average

Dimmer III temperature operating range: 35F to 110F

Available roller conveyor size: 36" wide by 5' length

Communications protocol: Dimmer III and Scale - RS-232 out

Serial to USB converter connector: Included for Dimmer III connectivity

Power requirements:

Dimmer III: Class 2 Transformer
Input: 120VAC, 60Hz, 16Watts
Output: 9VDC @ 1000mA
